KABBALAH AND ASTROLOGY

JONATHON CLARK

The position of the planets in the heavens is reflected in the psyche of each individual and in the events on earth subject (sometimes...) to the exercise of freewill. This multidimensional model is better understood when seen in conjunction with Kabbalistic teachings which set out universal principles of which astrology is one aspect. After an outline of the theory we will look at example charts - bring your own chart for discussion if you dare!

Jonathon Clark has studied and practised astrology since 1987 and has been a student of Kabbalah with Warren Kenton (Z'ev ben Shimon Halevi) since 1992. He has led groups and workshops and written articles on both subjects throughout this period.
